

Renuka Devi Ratnala

B.Tech – Information Technology
Shri Vishnu Engineering College for Women

deviratnala13@gmail.com | GitHub | LeetCode | LinkedIn

Education

Bachelor of Technology (B.Tech) – Information Technology

2024 – 2028

Shri Vishnu Engineering College for Women

CGPA: **9.18**

Experience

Java Developer Intern (Ongoing)

June 2026 – Present

EduSkills

- Developing backend applications using Java, Spring Boot, REST APIs and MySQL through industry-oriented projects.
- Designing modular backend components using layered architecture, object-oriented programming principles and Software Development Life Cycle (SDLC).
- Collaborating with team members using Git while strengthening backend development, API integration and database design skills.

Technical Skills

- **Programming Languages:** Java (Primary), Python, JavaScript, SQL, C
- **Backend Development:** Spring Boot, REST APIs, Spring Security, JWT Authentication, Layered Architecture, SDLC
- **Web Technologies:** React, HTML, CSS, JavaScript
- **Databases:** PostgreSQL, MySQL, JDBC, SQL, Relational Database Design
- **Cloud:** AWS Cloud Fundamentals, Cloud Computing Fundamentals
- **AI/ML:** Machine Learning Fundamentals, Predictive Analytics, Decision Support Systems
- **Core Computer Science:** Object-Oriented Programming (OOP), Data Structures Algorithms, Database Management Systems (DBMS), Operating Systems, Software Engineering Principles
- **Developer Tools:** Git, GitHub, IntelliJ IDEA, VS Code, Maven

Projects

Smart Resume Advisor

Java — Spring Boot — REST APIs — MySQL

Live Demo | GitHub

- Developed a backend resume analysis platform using Java, Spring Boot, REST APIs and MySQL.
- Designed RESTful APIs for resume analysis, skill extraction and recommendation generation.
- Built a resume-job matching engine that generated compatibility scores and personalized recommendations.
- Applied object-oriented design principles and relational database modeling to create scalable and maintainable backend services.

OfferForge – AI-Powered Startup Evaluation Platform

Java — Spring Boot — PostgreSQL — AI/ML

— REST APIs

GitHub

- Developed an AI-powered startup evaluation platform using Java, Spring Boot and PostgreSQL to support data-driven investment and project assessment.
- Built REST APIs for project submission, risk assessment, AI-generated recommendations and dashboard analytics.
- Designed a modular backend architecture integrating AI/ML-based decision support for project prioritization and market intelligence.
- Implemented relational database design in PostgreSQL and applied layered architecture to develop scalable and maintainable backend services.

Competitive Programming

- Solved 100+ Data Structures and Algorithms problems using Java, strengthening problem-solving and complexity analysis across Arrays, Strings, Trees, Graphs and Binary Search.

Achievements and Activities

- Selected as an AQVH Semi-finalist based on technical feasibility and innovative solution design.
- Participated in NASA Space Apps Challenge 2025, collaborating to solve real-world challenges using technology.
- Cleared institute-level screening for Smart India Hackathon (SIH) through solution design and technical evaluation.
- Secured 1st Place in an Idea Pitching Competition by presenting an innovative technology-based solution.
