

Renuka Devi Ratnala

B.Tech – Information Technology
Shri Vishnu Engineering College for Women

deviratnala13@gmail.com | GitHub | LeetCode | LinkedIn

Education

Bachelor of Technology (B.Tech) – Information Technology Shri Vishnu Engineering College for Women CGPA: 9.18	2024 – 2028
---	-------------

Experience

Java Developer Intern (Ongoing) EduSkills	June 2026 – Present
---	---------------------

- Developing backend applications using Java, Spring Boot, REST APIs and MySQL through industry-oriented projects.
- Applying Software Development Life Cycle (SDLC), layered architecture, Git and object-oriented design principles.
- Collaborating on real-world backend development while improving database design and problem-solving skills.

Technical Skills

- **Programming Languages:** Java (Primary), Python, JavaScript, C
- **Backend Development:** Spring Boot, REST APIs, Layered Architecture, SDLC
- **Web Technologies:** HTML, CSS, JavaScript, React
- **Databases:** MySQL, JDBC, SQL, Relational Database Design
- **Core Computer Science:** Object-Oriented Programming (OOP), Data Structures, Algorithms, Database Management Systems (DBMS), Operating Systems
- **Developer Tools:** Git, GitHub, IntelliJ IDEA, VS Code

Projects

Smart Resume Advisor Live Demo GitHub	<i>Java — Spring Boot — REST APIs — MySQL</i>
---	---

- Developed a backend resume analysis platform using Java, Spring Boot, REST APIs and MySQL.
- Implemented PDF resume parsing and automated skill extraction for intelligent resume evaluation.
- Designed scalable REST APIs and normalized relational database schemas using MySQL.
- Built a resume-job matching engine generating compatibility scores and personalized recommendations.

OfferForge GitHub	<i>Java — Spring Boot — Spring Security — JWT — REST APIs — MySQL</i>
-----------------------------	---

- Developed a backend referral and internship management platform using Java, Spring Boot and MySQL.
- Implemented secure authentication and authorization using Spring Security and JWT.
- Designed REST APIs supporting user management, internship applications and referral workflows.
- Applied layered architecture, object-oriented design and normalized relational database schemas to build scalable backend services.

Competitive Programming

- Solved 100+ Data Structures and Algorithms problems using Java, strengthening problem-solving and complexity analysis across Arrays, Strings, Trees, Graphs and Binary Search.

Achievements and Activities

- Selected as an **AQVH Semi-finalist** based on solution feasibility and technical approach.
- Participated in the **NASA Space Apps Challenge 2025**, collaborating on real-world data-driven problem solving.
- Cleared institute-level screening for the **Smart India Hackathon (SIH)** through solution design and requirement analysis.
- Secured **1st Place** in an Idea Pitching Competition for presenting an innovative technology solution addressing a real-world problem.
